Health Professions and Technologies Program Demographic Study 2001-2002 Academic Year

Crosstabs by Age Groups and GIS Maps

**Requested by:** Program Marketing

**Purpose/Objective:**

To present a demographic profile of all Health Professions and Technologies students who attended OCC between July 2001 and June 2002, and then compare demographic data between HPT and Non-HPT students.

## Executive Summary

### Purpose of the Study

The purpose of this study is to present a demographic profile of all Health Professions and Technologies (HPT) (formerly Allied Health) students attending OCC from July 2001 to June 2002.<sup>1</sup> Moreover, the study also compares demographic data of those students with a declared HPT curriculum (*HPT Students*) to those students who did not declare a HPT curriculum, but enrolled in HPT courses nonetheless (*Non-HPT Students*).

For the purpose of this study, the following 18 disciplines are considered Health Professions and Technologies programs:

- Dental Hygiene
- Diagnostic Medical Sonography
- Electroneurodiagnostic Technology
- Exercise Science and Technology
- Health Care Administration
- Hospital Pharmacy Technology
- Histologic Technology
- Medical Assisting
- Medical Technology
- Massage Therapy
- Nuclear Medicine
- Physical Education and Recreation
- Radiologic Technology
- Respiratory Therapy
- Radiation Therapy Technology
- Surgical Technology

---

<sup>1</sup> This sample (N = 1503) includes all students who had a declared HPT curriculum *at some point* during July 2001 and June 2002. This sample includes students that may have either changed their declared curriculum to a HPT program during the specified time period, or had a declared HPT curriculum during the specified time period, but later declared a non-HPT curriculum.

## Methodology

The data used in this study was extracted from students' records on the terms census date (one-tenth day of the term), highlighting those students who attended OCC between July 2001 and June 2002.

## Limitations

Due to the changing nature of program curriculum codes, only curriculum codes utilized during the 2001 and 2002 academic year were examined for the purpose of the study. Thus, any curriculum codes utilized prior to 2001 were not calculated in the final results. Furthermore, although all cases were unduplicated by Social Security Number and Student Identification Number, there is a slight possibility that some cases may have been duplicated due to the transition from Legacy to Colleague.<sup>2</sup>

---

<sup>2</sup> Duplicating students may occur if, for instance, a student provided their Social Security Number in Legacy, but chose not to provide their Social Security Number in Colleague, but rather chose to be identified by their OCC identification number only.
