Memo

TO: Martin Orłowski
FROM: Richard T. Thompson, Chancellor
DATE: April 28, 1997
SUBJECT: **ZIP CODE PENETRATION RATES**

Please place this data in a context such as a comparison to other community colleges in the state, national figures, state institutions, and private institutions. Is there any historical/trend information?

Memo

RECEIVED
APR 15 1997

To: Campus Presidents
From: Martin A. Orłowski, Director,
Institutional Planning & Analysis
Date: April 14, 1997
Subject: Zip Code Penetration Rates

On request of the Board of Trustees the Office of Institutional Planning & Analysis has prepared the 1995-96 Zip Code Penetration Report. This report is based on the total number of students served at each campus between July 1, 1995 and June 30, 1996. The college-wide report depicts total unduplicated students during the same period.

Penetration rates were calculated by dividing the number of students per zip code by the number of residents eighteen years and older living in the zip code. Population data are based on 1994 census updates. Zip codes with fewer than ten students are not included in the report.

In order to make this information more user-friendly, we are working with Wayne State University to develop color coded maps which will highlight areas of greatest penetration. I expect to have the maps ready for distribution by mid-May. Such information will be helpful in determining where to focus and assessing marketing efforts. If you have any questions with regard to this report, please do not hesitate to call me at 7746.

pc: R. Thompson
