Subject: 1996 Fall Registration Survey Results

Attached is a summary of the Fall 1996 Registration Survey we conducted to determine the factors which influence students' registration decisions. I've included the data from the summer version of this survey for comparative purposes. While there is some variation in the campus data for the summer and fall terms, the overall findings for each term are comparable. In both terms, "taking a specific class" was most frequently cited as a major influence, while "taking a class from a specific instructor" was least commonly cited.

Please note that the campus counts at the bottom of the page may not add up to the overall figure as headcount was duplicated. In addition, students who responded to the survey but subsequently dropped courses are not represented in the campus counts.

Please let me know if you have any questions about the data. I can be reached by PROFS at CLHAWKIN or at extension 7698.
