I am guessing based on the numbers that the non-credit credits offered are sporadic. So, this may happen in the future.

It should state the following (similar to what you've already stated.:

"In comparison to the End of Session, Summer I 2005, credit hours went from 0.0 to X.X. Percentages could not be calculated (or else not applicable)."

Not sure if there's a way to automate that so that if a % is returned, we can get that value, and if not, then we show the actual credits from each time period.

On the Highland Lakes Student Credit hours, third paragraph should not be a duplicate of the previous. For both 1 and 5 years the credit hours went from 0 to something. How do you want that verbiage to read? Currently it reads remained at zero which is incorrect. We have not included this scenario yet.

Let me know when they are done data checking. I've spot checked a few items, and found possible errors on:

Page 3 (Student Credit Hours-- Highland Lakes) "Summer I 0.917"  
should be "Summer I 2005"

Page 3 (Student Credit Hours-- Highland Lakes) Actual End of Session (non-credit) 5 year % change shows #DIV/0!  
should be N/A\*\*

Page 9 (Student Headcount-- Highland Lakes) Actual End of Session (non-credit) 5 year % change shows #DIV/0!  
should be N/A\*\*

Page 12 (Student Headcount-- Southfield) "The End of Session Student Headcount at the Southfield campus decreased 10.7% since Summer I"  
missing " 2005."

Also, I noticed we got another whole number case (32%) instead of returning the decimal place (32.0%). Try the following function -- FIXED. Type in your formula as follows -- =FIXED (Cell 1/Cell2, 2). This formula returns a text value, and you will have to realign the text to the right. This will give us the value we need and remains a calculation, so it stays automated.

Question is, do you want to create the PDF of the charts, or shall I? If you'd like me to

make the PDF, please place a copy of the report in the folder:

I:\Internal Reporting\Enrollment\Official Enrollment\Distribution Summer One (Spring)\2006  
sum I

And I'll create the report.

Thanks.

Mark

**Registration Headcounts**

This report provides Oakland Community College registration activity for the Summer I 2006 term. The counts for the Summer I term include the first 7.5 week courses along with the 15 week courses; while the Summer II term counts include the second 7.5 week courses. Data extracts were taken daily at 6 a.m. Each data extraction includes: run date, total college counts, and campus counts for the previous registration day. The final set of data presented is based on student records in which a student's status is active within a course. Students who withdrew from all courses (or whose status is not active in any course) are not included in student headcounts. The headcount numbers are cumulative in nature and show the volume of activity up to a given day during the entire registration period.

In reviewing this information, please note the following:

- When comparing headcounts from day to day, only a NET gain or loss can be calculated. Adds, Drops, Cancellations, and New Registrations cannot be evaluated.
- Headcounts are assigned to the 'District-wide' category when a location other than the five campuses are noted. This could be a result of a delay in assigning a campus to a course or section, or could include credits by examination, externships, internships, or co-ops.
- The category of 'multi-campus' indicates the number of students enrolled in more than one campus location.

## Registration Credit Hours

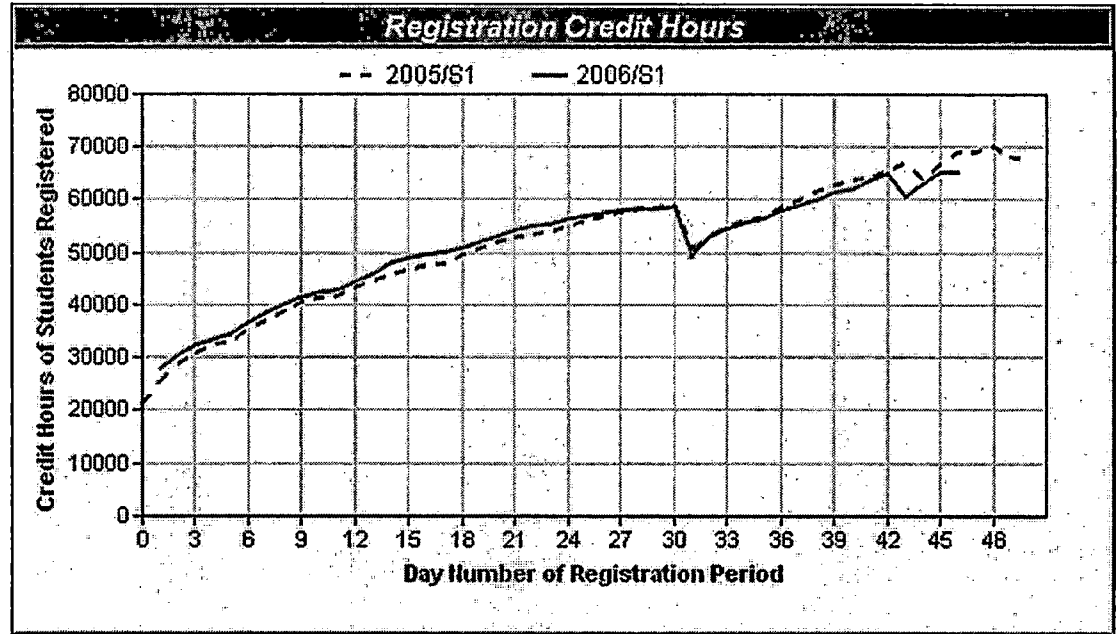

This report provides Oakland Community College registration activity for the Summer I 2006 term. The counts for the Summer I term include the first 7.5 week courses along with the 15 week courses; while the Summer II term counts include the second 7.5 week courses. Data extracts were taken daily at 6 a.m. Each data extraction includes: run date, total college counts, and campus counts for the previous registration day. The final set of data presented is based on student records in which a student's status is active within a course. Students who withdrew from all courses (or whose status is not active in any course) are not included in student credit hours. The credit hour numbers are cumulative in nature and show the volume of activity up to a given day during the entire registration period.

In reviewing this information, please note the following:

- When comparing credit hours from day to day, only a NET gain or loss can be calculated. Adds, Drops, Cancellations, and N Registrations cannot be evaluated.
- Credit hours are assigned to the 'District-wide' category when a location other than the five campuses are noted. This could be the result of a delay in assigning a campus to a course or section, or could include credits by examination, externships, internship co-ops.
